

# Datasheet enerSENSE CO<sub>2</sub>

### We make sensing in buildings powerful, scalable & sustainable

Smart building sensors powered by indoor light

enerSENSE wireless building sensor for indoor air quality  $(CO_2)$ , temperature, humidity and motion monitoring. Power is supplied by our proprietary indoor photovoltaic technology.

Easy installation without battery replacement. LoRaWAN communication for simple and scalable installations.

### **Applications**

- Building energy efficiency
- Health & well being
- Building utilization

### Use cases

- Monitoring of room climate & air quality for green building certification
- Monitoring of office space utilization
- Improving energy efficient manual venting
- Room climate control in combination with smart thermostates
- Additional wireless sensors for energy efficient HVAC operation

### Powered by indoor light - no battery replacement or wiring

- Powered by indoor light through enerthing's proprietary photovoltaic technology
- Smart power management on device and cloud level for reliable and efficient operation
- Superior performance to battery-powered sensors

### Sustainable

- Long product lifetime & elimination of maintenance processes
- Reduction of battery- and electronics waste
- Circular product design

### **Product features**

| Included sensors           |
|----------------------------|
| Temperature                |
| Humidity                   |
| Air pressure               |
| Motion (PIR)               |
| CO <sub>2</sub>            |
| Light                      |
| Acceleration / orientation |

| User interfaces |
|-----------------|
| LED (RGB)       |
| Buzzer          |
| User-button     |

| Device control             |  |  |
|----------------------------|--|--|
| NFC configuration          |  |  |
| Over the air configuration |  |  |
| Firmware up-date via app   |  |  |

## Specifications

| Radio / Wireless                   |  |  |  |  |
|------------------------------------|--|--|--|--|
| Wireless technology                | LoRaWAN® 1.0.3   | LoRaWAN® 1.0.3   |  |  |
| Wireless security                  | LoRaWAN® end-to-end encryption (AES-CTR), data integrity protection (AES-CMAC)   |  |  |  |
| LoRaWAN device type                | Class A end-device   |  |  |  |
| Supported LoRaWAN® features        | OTAA, ADR, adaptive channel setup  |  |  |  |
| Supportet LoRaWAN® regions         | EU863 – 870  |  |  |  |
| RF transmit power                  | +14 dBm  |  |  |  |
| Link budget                        | 137 dB (SF7) to 151 dB (SF12)  |  |  |  |
| Energy Supply                      |  |  |  |  |
| Photovoltaic module                | Enerting's highly efficient indoor photovoltaic technology is optimized for artificial (LED or fluorescent) or ambient light indoors. Inhouse development and production of our proprietary technology in Germany. |  |  |  |
| Minimum illumination conditions    | Depending on device settings and environment < 100 lx possible   |  |  |  |
| Secondary battery (accumulator)    | Storage 700 mAh rechargeable secondary battery (storage size customizable)   |  |  |  |
| Energy management circuit          | Charge- and power management circuit with monitoring of battery voltage, PV module voltage and PV harvesting current   |  |  |  |
| Energy management software         | Energy management incorporated in embedded software on the device and in the cloud   |  |  |  |
| Sensor Data logging & transmission |  |  |  |  |
| Sampling interval                  | Configurable via NFC and downlink  |  |  |  |
| Data transmission interval         | Configurable via NFC and downlink  |  |  |  |
| Sensors                            | Feature  | Range  |  |  |
| CO <sub>2</sub>                    | Measurement range  | 0 to 5000ppm   |  |  |
|                                    | Accuracy   | +/-45 ppm or +/- 3 %   |  |  |
|                                    | Sensor type  | Near infrared measurement (NDIR)   |  |  |
|                                    | Calibration  | Automatic or fresh-air calibration via downlink or NFC                         |  |  |
|                                    | Measurement interval   | Optimal settings dependent on light-condition, default is 15 min, configurable |  |  |
| Temperature                        | Measurement range  | -40° C to 85° C<br>0° C to 65° C full accuracy                                 |  |  |
|                                    | Accuracy   | +/- 1° C   |  |  |
| Humidity                           | Measurement range  | 10 % to 90 % RH  |  |  |
|                                    | Accuracy   | +/- 3 % @ 20 % to 80 % RH  |  |  |

## **Specifications**

| Pressure                  | Measurement range  | 300 to 1100 hPa  |  |  |
|---------------------------|--|--|--|--|
|                           | Accuracy   | 1,0 hPa @ 0°C to 65° C   |  |  |
| Light                     | Measurement range  | 0 - 83 k lux   |  |  |
|                           | Accuracy   | 0,01 lx  |  |  |
| Acceleration              | Used for manipulation alarm (device has been touched / dropped / d   | Used for manipulation alarm (device has been touched / dropped / changed position / moved for >5sec) |  |  |
| Motion (PIR)              | Dual detector with interrupt function  |  |  |  |
|                           | ADC output resolution  | 14 bit   |  |  |
|                           | Field of view  | 146°   |  |  |
| Interface & Feedback      |  |  |  |  |
| LEDs                      | RGB  | RGB  |  |  |
| (Alarm)-Buzzer            | Acoustic warning e.g., when measured CO <sub>2</sub> level above defined threshold, buzzer can be disabled | 85 dB @10 cm   |  |  |
| User-button               | Factory reset, etc.  | Factory reset, etc.  |  |  |
| NFC interface             | For reading and changing device settir   | For reading and changing device settings   |  |  |
| Mechanical specifications |  |  |  |  |
| Colour                    | White (RAL 9016)   | White (RAL 9016)   |  |  |
| Dimensions                | 162 mm x 114 mm x 20 mm (H x W x D)  | 162 mm x 114 mm x 20 mm (H x W x D)  |  |  |
| Protection                | IP30   | IP30   |  |  |
| Enclosure material        | PC / ABS   | PC / ABS   |  |  |
| Weight                    | 140 g  | 140 g  |  |  |
| Operating conditions      |  |  |  |  |
| Temperature               | 0° C to 50° C  | 0° C to 50° C  |  |  |
| Humidity                  | O to 85 % RH (no condensation)   | O to 85 % RH (no condensation)   |  |  |
| General                   |  |  |  |  |
| Storage temperature       | -30° C to +70° C   | -30° C to +70° C   |  |  |
| Warranty                  | 12 months. For extended warranty per   | 12 months. For extended warranty periods, please contact us.   |  |  |
| Expected lifetime         | > 15 years   | > 15 years   |  |  |

### Illumination condition indoors and available energy for powering your sensing device

We have engineered the enerSENSE device to harvest sufficient light for a variety of sensing applications under the consideration of typical illumination conditions in industry, logistics building and office spaces.

### High quality data by Smart Power Management

We have implemented a smart power management on the device as well as on cloud level (optional). While the sensor is designed to provide the performance required in the specific application, more energy provided by better illumination conditions can also be exploited by generating better data. This can be more sensor data, higher resolution of said data, higher signal strengths or the ability for more frequent over the air changes of device parameters. Our smart power management enabled by additional internal sensors for monitoring energy flows is based on algorithms implemented on device level as well as on cloud level.

#### Customization

Applications often result in specific requirements.

We are open to customize our solution to your needs – just contact us!

### Installation & commissioning

Device installation & commissioning can be done by the customers. For documentation please visit www.enerthing.com/support. For further assistance feel free to contact us at support@enerthing.com.

### Disposal

According to the European WEEE directive, electrical and electronic equipment must not be disposed with consumers waste. Its components must be recycled or disposed apart from each other. Otherwise contaminative and hazardous substances can pollute our environment. You as a consumer are committed by law to dispose electrical and electronic devices to the producer, the dealer, or public collecting points at the end of the devices lifetime for free. Particulars are regulated in national right. The symbol on the product, in the user's manual, or at the packaging alludes to these terms. With this kind of waste separation, application and waste disposal of used devices you achieve an important share to environmental protection.

### Declaration of conformity

Hereby the enerthing GmbH declares that enerSENSE sensors complies with the essential requirements and other relevant provisions of Directive 2014/30/EU and 2014/53/EU.
