Introducing the ultimate
LoRaWAN Multi Room Sensor

Simplifying Smart
Room Monitoring

LoRaWAN®

CO₂

One Multi Room Sensor
countless benefits

Minimised Integration Effort
Only one device to integrate – save time and reduce setup complexity.

Proven Technology
Over 10 years of sensor expertise, built for reliability and longevity.

Reduced Data Traffic
Fewer devices mean less network load and smoother performance.

Customisable Design
Tailor housing and appearance to fit your environment.

Multiple Use Cases
Cover indoor air quality, CO_2 monitoring, demand-based heating and light control.

Sustainability
Energy-efficient, reduces your carbon footprint and supports green building goals.

Cost Optimisation
Minimise installation and operational costs, optimize TCO.

Flexible Power Options
Works with a variety of battery types, AA battery included.

Increased Well-Being
Monitor air quality to improve comfort and reduce health risks.

5-Year Warranty
Developed and made in Germany, backed by long-term know-how.

Wireless Flexibility
LoRaWAN integration allows wireless operation without the need for cabling.

Easy Configuration
Quickly set up and adjust settings via smartphone, PC, or LoRaWAN Downlink.
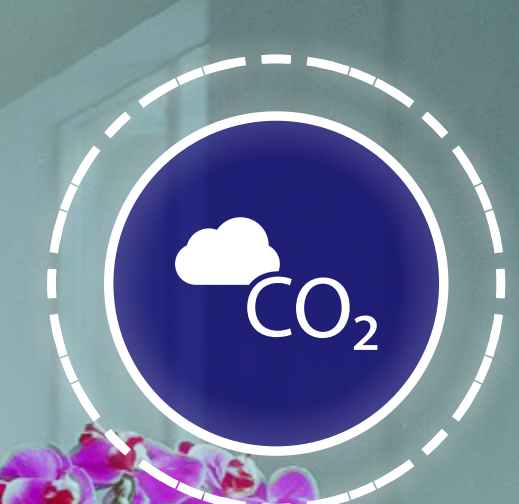

Minimise Integration Effort

Only one device to integrate –
save time and reduce setup complexity.

Reduce Data Traffic

Fewer devices mean less network load and smoother performance.
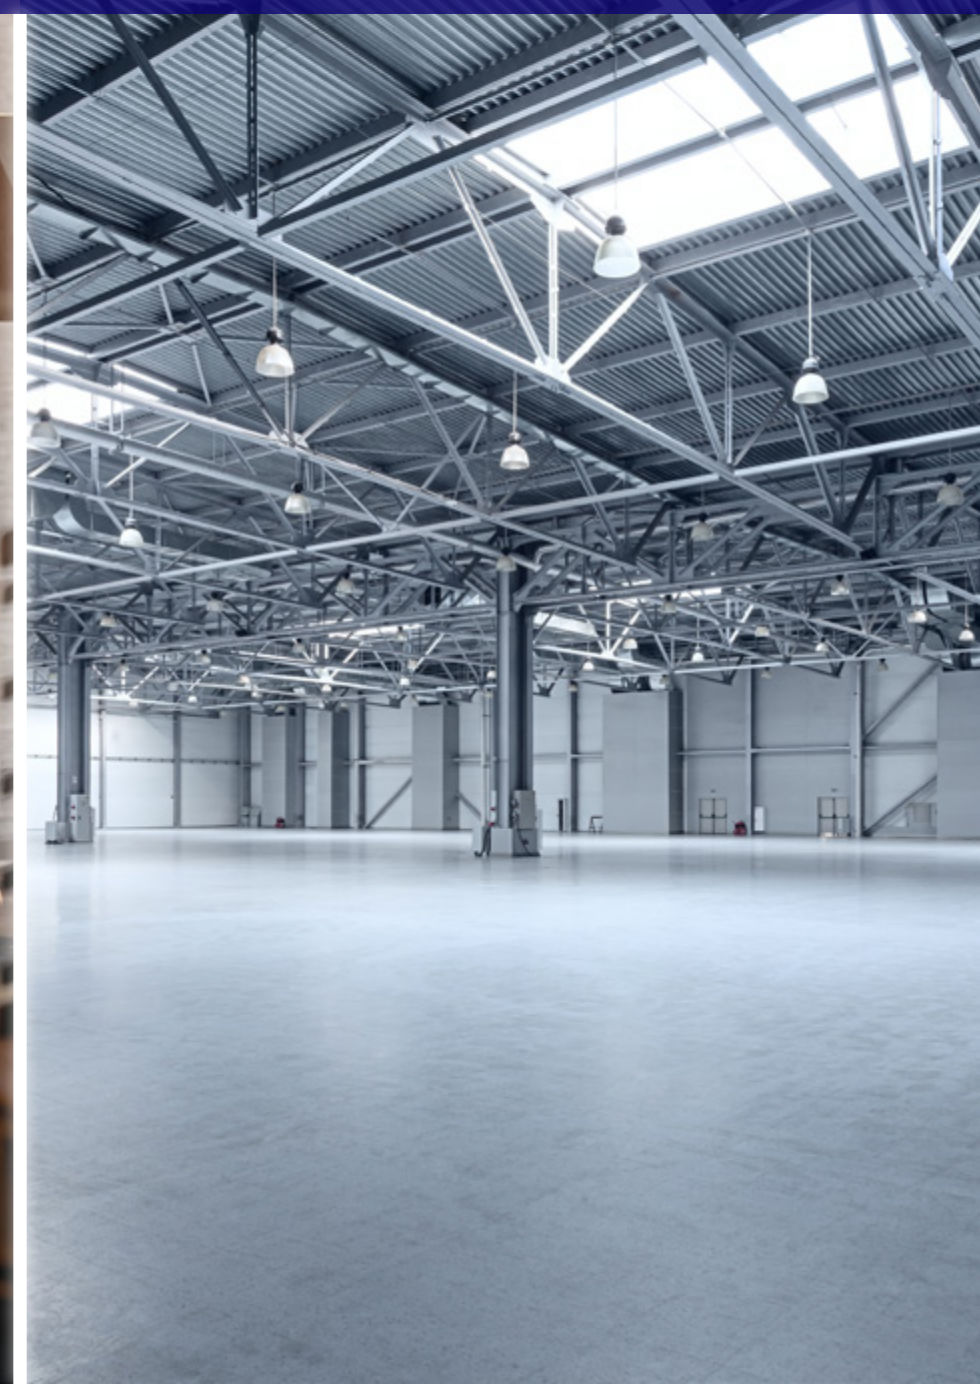

Flexible Power Options

Works with a variety of battery types, AA battery already included.

Multiple Use Cases

Cover indoor air quality, CO2 monitoring,
demand-based heating and light control with one device.

Increase Well-Being

Monitor air quality to improve comfort and reduce health risks.

Sustainability

Energy-efficient, reduces your carbon footprint and supports green building goals.

Cost Optimisation

Minimise installation and operational costs, optimise TCO.

Wireless Flexibility

LoRaWAN integration allows wireless operation without the need for cabling.

Easy Configuration

Quickly set up and adjust settings via smartphone, PC or LoRaWAN Downlink.

Proven technology – with a 5-Year Warranty

Over 30 years of sensor expertise with a 5-year warranty, developed and made in Germany.
