# MultiTech Conduit<sup>®</sup> 300 Series Access Point for

Access Point for LoRa® Technology

MultiTech Conduit  $^{*}\text{AP}$  300 Series Access Point featuring the mPower  $^{**}$ 

Edge Intelligence operating system serves as a gateway or access point that enables connectivity between LoRaWAN<sup>®</sup> wireless IoT devices and the network or cloud infrastructure. The Conduit AP Access Point offers various wide-area-network communication options, including wired and wireless interfaces, allowing flexibility in connectivity. It supports the LoRaWAN protocol in addition to Ethernet and cellular connectivity options, depending on the specific model and configuration.

The Conduit AP is designed for indoor use in industrial applications such as smart buildings, retail, agriculture, and other deployments where reliability and secure long range data communication is essential. The device acts as a gateway between the LoRaWAN end IoT devices and the wider network, facilitating data transmission and enabling remote management and monitoring of connected devices.

Security is a crucial aspect of IoT deployments, and the Conduit AP Access Point provides built-in hardware security features to protect data and devices. mPower includes features such as encryption, authentication mechanisms, firewall capabilities, and secure protocols to safeguard against unauthorized access or data breaches.

The MultiTech Conduit AP Access Point serves as a versatile and reliable LoRaWAN gateway for IoT deployments, enabling seamless connectivity, secure data transmission, and efficient management of connected devices.

#### BENEFITS

 Integrations with cloud-based LoRa Network Server and IoT Cloud platforms

NULTITECHC

- Embedded LoRa Network Server for an out-of-box LoRaWAN network
- MultiTech DeviceHQ<sup>®</sup> device, network and application management
- Global LoRa channel plans
- GCF, PTCRB, and Mobile Network Operator approvals

#### FEATURES

- mPower Edge Intelligence
   operating system
- Secure Boot, data encryption and dual-image partitioning
- Python, C, C++, JavaScript, Node.js
- SX1303 8-channel LoRa baseband processor
- LoRaWAN 1.0.4 specification compliant (software upgradeable to future releases)
- Listen-Before-Talk
- Internal or External LoRa antenna options
- Configurable UDP and Basic Station Packet Forwarder
   LoRaWAN MQTT
- Broker application

#### **Services & Warranty**

MultiTech's comprehensive Support Services programs offer a full array of options to suit your specific needs. These services are aimed at protecting your investment, extending the life of your solution or product, and reducing total cost of ownership. Our seasoned technical experts, with an average tenure of more than 10 years, can walk you through smooth installations, troubleshoot issues and help you with configurations.

#### **Technical Support Services**

At MultiTech, we're committed to providing you personalized attention and quality service while providing you a quick response to your product support needs. We have several options of support for you to choose from.

For additional information on Support Services as well as other service offerings, please contact your MultiTech representative or visit www.multitech.com/support.go
